
Mooring Ring Bolts

MOORING RING BOLTS: Drop Forged Steel - Hot Dipped Galvanized

Mooring ring bolts are sometimes used in place of, or along with, the open base mooring cleats for safely mooring a vessel to a dock. The mooring ring bolts, as we suggest with mooring cleats, should always be bolted completely through the main structure of the dock.

ITEM NO.	MATERIAL DIAMETER	SHANK LENGTH	RING I.D.	THREAD LENGTH	WEIGHT
05-31	5/16"	2 1/4"	2"	1 1/2"	.32 lbs
--	5/16"	4 1/4"	2"	2 1/2"	.35
