
Corner Bumper

Designed and molded from Non-Yellowing, Very Tough, Marine Grade Vinyl

For attachment to wood structures, use large headed non-staining aluminum or stainless steel nails as described in our catalog Section 08. On metal structures, use stainless steel or aluminum sheet metal screw and washer.

UNIVERSAL 10" CORNER DOCK BUMPER
ITEM NO. 03-06A

Designed with a flat end to mate with most dock bumper extrusions. It offers 10 inches of protection on two sides of the dock corner. The side height is 4 inches.

REGULAR 10" CORNER DOCK BUMPER
ITEM NO. 03-06B

Offers 10 inches of protection on two sides of the dock corner, side height is 3 1/2 inches.

MINI-CORNER DOCK BUMPER
ITEM NO. 03-07M

Designed to give a continuous look to our 301 and 302 extruded dock bumper. It provides a molded-in cushion of air at the dock corner. This corner offers 5 inches of protection on two sides of the dock corner. It is easily installed, simply plug the corner into the 302 bumper extrusion and attach same as above.

UNIVERSAL 6" CORNER DOCK BUMPER
ITEM NO. 03-07U

Designed with a flat end to mate with most extrusions. It offers 6 inches of protection on two sides of the dock corner. The side height is 4 inches.

For orders less than full cases, a 25% "split case" charge will apply.
