## GANGWAY WHEELS - ALUMINUM

These wheels are high quality, non-corrosive cast aluminum metal. Sand-cast Aluminum casting combines weight, economy and long life with maximum strength. Single-wall construction offers a light, durable wheel with the ability to absorb impact. The wheel is engineered to transmit load levels directly to the bearing surface for smoother action.

The finest natural rubber is compounded under controlled formulas to guarantee uniform toughness, long-life and maximum resiliency. Cold or "permanent set" is virtually eliminated. This material resists chipping and abrasion.

Available with Self Lubricating Oil Retaining Powdered Iron Bearing - an economical sleeve-type bearing where varied load capacity is required. Although not recommended for marine use, wheels are also available with ball bearings, roller bearings and tapered roller bearings by special order.

ITEM NO.	DIMENSIONS
07-25	6" diameter x 2" width x 3/4" axle size
07-29	8" diameter x 2" width x 3/4" axle size
07-30	10" diameter x 2" width x 3/4" axle size

Other sizes available by special order. Please call for details.
