

Jim Buoy Mooring System and Buoys

JIM BUOY MOORING BUOYS

The Jim Buoy Premium Mark V utilizes one of the toughest plastics available today...CJ-37. This plastic provides an outer shell of 1/8" thickness. The core is 3 lbs. high density polyurethane foam. All eye bolts are permanently bonded inside the buoy during the molding cycle.

MODEL	DIAMETER	SWIVEL AND EYE	PACK	SHIP WEIGHT
4400	12"	1/2"	4	26 lbs.
4401	15"	1/2"	4	42 lbs.

4403	24"	5/8"	1	27 lbs.
4403-T	24"	2" tube	1	24 lbs.
4404	30"	5/8"	1	47 lbs.
4404-T	30"	2" tube	1	47 lbs.

JIM BUOY MOORING SYSTEM

Model #4000, single pack. Shipping weight 5 lbs.

The large 3/4" x 6" diameter ring fits securely in the slotted opening of the star plate and is held in a fixed, upright position by constant tension from the chain weight. The rugged 1/4" x 6" diameter concave star plate is designed to fit the top of your buoy and prevent "pull through". All parts are hot-dipped galvanized steel construction.
